Landing page

This page includes many tags and attributes like metatags, body, header etc.. We have added many interesting and Modern things in this page like SVG Icon(which are mostly used in all websites), Favicon, Image Hovering Property, Google Fonts, Hyperlinks. This page includes the information of other pages like; location, login, our business, about us.

Login

In this page we have mostly worked upon adding images and enhancement of the text and using some hovering effects in the login button and used simple tags like p, h1 and input etc. Here we have to add username and password.

Our Business

This is "Our Business" page developed using HTML and CSS. On this page we going to tell about our some specialty which makes us market leader. We have developed this page using basic HTML tags. The main speciality of our page is that its background is changing automatically which makes it different.

Earthmoving Plant Hire Victoria, New South W Queensland

Looking for earthmoving plant hire services in Sydney, Brisbane or Melbourne? domestic projects to major commercial developments – you can trust Eastern

Plant & Equipment Hire Available Across Melbourne, Sydney and

As one of Australia's leading plant hire companies, Eastern Plant Hire offers an extensive range of earthmoving machinery and earthmoving equipment available for hire across Melbourne, Sydney and Brisbane. All our machines are meticulously maintained and upheld to only the strictest industry standards – ensuring all earthmoving plant for hire is as safe, efficient, and effective as possible. Our operators have an extensive experience and have the required licenses to complete projects

Projects

In this project page we have worked upon adding background images, padding and enhancement of the text. By using simple tags like p, h1 and input etc. And in this page we also write our whole information about our past, what we have done.

About Us

Here is the “About Us” section of our page which is most important for our company. Our Customer may contact us from this page. He/She can write us mail, fill form or directly call us. We have developed this using HTML tags and styled with CSS. We have used button, footer, body etc..
